Del Rio, TX

Phone: 830-734-6643 | Email: theelenacarey@gmail.com

LinkedIn: <https://www.linkedin.com/in/elena-carey> | Portfolio: <https://elenalaree.github.io/Portfolio/>

## SUMMARY

Full-Stack developer with a background in music and educational teaching. Meticulous developer passionate about helping teams reach goals. Strengths include seeing other's talents and understanding how to work together to reach team goals. A knack for front end design that is clean, intuitive, and responsive.

## TECHNICAL SKILLS

**Softwares/Platforms:** Experience with Chrome dev tools.

**Software Languages:** Experience with HTML, CSS, SQL, MySQL, MongoDB, Mongoose, PWAs, React, and JavaScript, in which I utilized Node.js, Express.js, Inquirer, Handlebars. I have tested using Jest.

**Soft Skills:** Teaching, attention to detail, debugging, communication tools, work ethic, determination, leadership.

## PROJECTS

**The Forgotten Pages** | <https://github.com/itsmarcotime/ForgottenPages> | <https://theforgottenpages.herokuapp.com/>

- Web app designed to be used for blogs or forum style website.
- My role was full stack creation of website based on user criteria
- MySQL, HTML, CSS, JavaScript using Node.js, handlebars.js, and express.js.

**Techie Time** | <https://github.com/elenalaree/TechieTime> | <https://techie-time.herokuapp.com/>

- Web app designed to be used for blogs or forum style website.
- My role was full stack creation of website based on user criteria
- MySQL, HTML, CSS, JavaScript using Node.js, handlebars.js, and express.js.

**Trackr** | [github.com/elenalaree/Trackr](https://github.com/elenalaree/Trackr) |

[https://drive.google.com/file/d/1Fc\\_h2PwzYCLOjwsQf8RkibPNlvrPge/view?usp=sharing/](https://drive.google.com/file/d/1Fc_h2PwzYCLOjwsQf8RkibPNlvrPge/view?usp=sharing/)

- This Command line app creates a directory of employees, jobs, and departments. It allows for creation of new departments, roles, and employees. One may also edit employee roles and managers.
- My role was to create a command line application from the ground up based on given user criteria.
- MySQL, JavaScript using Node.js, inquirer.js, mysql2, and express.js. Jest was also used for testing.

**Weather In The World** | [github.com/elenalaree/WeatherInTheWorld](https://github.com/elenalaree/WeatherInTheWorld) | [elenalaree.github.io/WeatherInTheWorld/](https://elenalaree.github.io/WeatherInTheWorld/)

- Web app designed to find the weather in a given city.
- My role was front end creation of the website based on user criteria.
- HTML, CSS, JavaScript, and JQuery
